SENIOR BACK-END ENGINEER

ABOUT ME

As a dedicated backend engineer, I have a keen focus on databases, particularly in resolving complex issues and creating intricate database designs. Emphasizing adherence to SOLID principles, my objective is to provide clean, efficient and scalable solutions. Moreover, I aim to establish and lead productive teams, spanning from fresh talents to experienced senior engineers.

PROFESSIONAL EXPERIENCE

Pomechain - United Arab Emirates, Dubai (Full-time remote) — **Aug 2023 - present**

Chief Architect & Head of Engineering — **Sep 2023 - present**

- Completely revamped the Jomlah Bazar B2B e-commerce back-end application from the ground up by creating the entire database structure. Transformed a chaotic 3-year-old system into a smooth and expandable platform with numerous endpoints.

Back-end Team Lead — **Aug 2023 - Present**

- Supervised a team of 5 to 7 senior engineers to develop the application in half the expected time, ensuring timely completion.
- Authored a uniform and organized coding style and Object-oriented design across the application. Integrated methods like Lucid architecture (a blend of SOA & DDD in Laravel) to significantly decrease code review time by more than 80%. Furthermore, generated comprehensive documentations for all aspects, leading to shorter and more efficient code review sessions with consistent paradigms lasting only 30 minutes to an hour.

Almas Rayane Javan - Iran, Isfahan (Full time) — **Mar 2022 - Jul 2023**

Full-Stack Team Lead — **Nov 2022 - Jul 2023**

- Developed REST API for an LMS hyper-app ahead of schedule, allowing for additional features (Laravel, MySQL).
- Trained and mentored job-ready trainees in 3 weeks, saving time.

Full-Stack Developer — **July 2022 - Nov 2022**

- Developed and executed the back-end REST API for an Ecommerce application using Laravel, and integrated the UI with Vue.js.

Junior Back-end Developer — **March 2022 - June 2022**

SKILLS

- Languages & Frameworks (Proficient)**: PHP**, **Laravel**, **SQL**
- Databases : **Relational Database design (**Entity-Relationship Modeling**), MySQL, Redis, SQL**
- Software Engineering : **OOP, SOLID principles, OOD & Design Patterns,** Algorithmic Thinking
- Testing & Misc : **TDD, PHPUnit, Linux,** Bash, VCS**(Git), Agile, RESTful APIs, Swagger**
- Architectural patterns**: REST, MVC, CQRS, Event Sourcing, Modular Design, Lucid Architecture**
- Front-End (Familiar) : Javascript, Typescript, Vue.js (v2 & v3), TailwindCSS, Vuetify

COURSES & CERTIFICATIONS

- Maktabsharif Coding Bootcamp - PHP/Laravel (+320 Hours) - 2021
- *Educative - Database design for software engineers*
- *Linkedin - Advanced Design patterns - Design principles*
- *Quera - Task-Oriented Course in Linux (Perfect)*
- *Linkedin - Leadership in Tech*
- *Linkedin - Building GraphQL application in Laravel*
- ... and **more**

EDUCATION

Art University of Tehran - 2015
Undergraduate Program - Industrial Design

ENGLISH PROFICIENCY

- *Listening: Native-Like*
- *Reading & Writing & Speaking: Professional*
